

SUPPLEMENT PARTS LIST

for the

Kodak RP X-Omat PROCESSOR, MODEL M7B-E

PLEASE NOTE The information contained herein is based on the experience and knowledge relating to the subject matter gained by Eastman Kodak Company prior to publication.

No patent license is granted by this information.

Eastman Kodak Company reserves the right to change this information without notice, and makes no warranty, express or implied, with respect to this information. Kodak shall not be liable for any loss or damage, including consequential or special damages, resulting from any use of this information, even if loss or damage is caused by Kodak's negligence or other fault.

This equipment includes parts and assemblies sensitive to damage from electrostatic discharge. Use caution to prevent damage during all service procedures.

Section 1: Introduction

Important

The *Kodak RP X-Omat* Processor, Model M7B-E is similar to that of the *Kodak RP X-Omat* Processor, Model M7B. The following items describe the differences between the 2 PROCESSORS:

- The built-in Transformer allows the M7B-E to operate at different voltages, by changing the configuration of the Jumpers in the Electrical Box.
- EMI FILTERS have been added to meet safety agency limits.
- The M7B-E has 3 separate drain lines for processor effluents.
- To accommodate the additional drain line, one of the wall mounting BRACKETS has been eliminated.
- Water input has been changed to provide a 25 mm air gap.
- The recirculation system has a 230 V dual-head RECIRCULATION PUMP.
- Minor plumbing changes are indicated in this Parts List.
- The M7B-E has a separate "Diagram Package".
- An EXHAUST GUARD has been added to the INNER HOUSING of the EXHAUST ADAPTER.

Note

This Parts List provides the part numbers for the Model M7B-E that are different from the Model M7B. Use this publication with the Parts List for the Model M7B.
